Accessories on request:

oil distributor size Ö3a

Special characteristics:

All rotators from other manufacturers show a more or less insufficient brake behaviour, which becomes apparent with an off-centre load or a load-generated centrifugal moment. Our special distributor (patents pending) largely eliminates this negative characteristic, thus preventing a turning away of the load holding equipment, e.g. a stone gripper. With firm resistance, sufficient elasticity is still available. (Overload protection for maximum braking torque).

Machine:

 e.g. hydraulic excavators-service weight:
 With pendulum-type mounting up to 25 ts
 With rigid mounting up to 20 ts

Add-on units:

 Wood saw grippers, positioning grippers
 Special devices on request.
